Eduardo Corral Rivas :: Software Engineer

Intro

Generalistic software engineer with strong OS/Networks foundation, and DevOps inclinations. Self-driven, motivated, adaptable, unsupervised.

Goals

Build great products that actually help people. Gradual transition to management positions, while keeping a solid technical foundation.

Skills

- Expert: Java & JVM ecosystem, Application Containers (Tomcat/JBoss), Spring Framework (including Boot), SQL (PostgreSQL/Oracle), REST, Shell scripting, Docker, Gradle/Maven/Ant, Jenkins, JUnit/BDD (Cucumber/Gherkin), Refactoring, SVN/Git, Linux
- Basic: Python, MongoDB, Kubernetes, Angular, Typescript, Dart, Flutter
- Previous: Solaris, C/C++, SOAP WS

Experience

2011-current (SF, USA) :: Calypso Technology (Fintech)

Software Engineer -> Senior Software Engineer -> Principal Software Engineer, Clearing & Margin Team

- Long term, and one of the main contributors to the award-winning OTC Clearing, and recently released ETD Clearing Calypso solutions
- Main designer, coder, tester, reviewer, best practices advocate, Confluence editor, and person-to-ask for the Clearing team
- Now taking the same roles and responsibilities in the Margin Cloud solution (ISDA Bilateral/OTC VaR/ETD Margin calculator implementations)
- Helped customers achieve successful implementations, including Santander, BBVA, HSBC, Swedbank, Erste Bank, CME, COMDER, . . .
- Designer and lead developer of CDML (Clearing Data Markup Language), the format and framework used by Calypso to acquire and digest CCP EOD data
- Docker evangelist: early adopter, advocate of Docker at Calypso, collaborating with Releng (DevOps) for a broader adoption in every day tasks, helping anyone wanting to learn the technology

2009-2011 (Madrid, Spain) :: Arcitel GFI/Experience IS for Ericsson SA/Telefónica I+D (Telecomm, Client networks)

Core services Architect/Developer, Dev Lead

- Continued role as designer/developer/tester of the event-driven provisioning workflow engine, this time for Telefónica Latinoamérica (TLATAM)

- Collaborator in the Telefónica OSS/Alcatel ACS integration project (CPE remote configuration via TR-069)
- Leading the project to migrate to Ericsson/Telefónica JIRA-based Demand Management Tool

2006-2009 (Madrid, Spain/Munich, Germany) :: Experience IS for Telefónica Deutschland (Telecomm, Client networks)

Core services Architect/Developer, Support

- Implemented business rules for Telefónica Deutschland DSL provisioning workflows, including systems integration (SOAP/JMS/HTTP)
- On site testing and pre-production support (pre/post O2 acquisition)
- Collaborated in the design and development of the in-house event-driven workflow engine

2005-2006 (Madrid, Spain) :: Coritel (Accenture Spain)

Developer, Dev Lead

- Helped Product Lifecycle Management/Supply Chain team with Windchill/Documentum implementations, including designing, developing, and testing client customizations
- Multiple clients: Metro de Madrid, Boston Scientific, Premier Image Technologies

Summer 2002 (Tres Cantos, Spain) :: Siemens SA

Intranet Summer Intern

Education

- 2016 : Situational Leadership II
- 2004 : Escuela Politécnica Superior, Universidad Autónoma. *Ingeniero Informático Superior (Computer Science Engineer)*
- 1997 : Certificate in Advanced English (CAE), Cambridge University
- 1996 : First Certificate in English (FCE), Cambridge University

Other

Spanish (native). 1st Calypso Talent Management promotion. Interest in music (listener and performer, former band member, 1 recording), reading, hiking, driving, traveling. Green Card holder.
